

A family of integrations for greater visibility and control in Microsoft environments

Dell EMC provides a family of integrations for full-stack management in Microsoft environments. When installed and configured, OpenManage Integrations for Microsoft System Center and OpenManage Integration with Windows Admin Center enable native management of Dell EMC systems and solutions. These integrations provide visibility and control of hardware infrastructure, operating systems and virtual machines.

OpenManage Integrations for Microsoft System Center

OpenManage Integrations for Microsoft System Center support native management of PowerEdge servers and Dell EMC Solutions for Microsoft Azure Stack HCI. Console-based offerings are available for integration with Microsoft System Center Operations Manager, System Center Configuration Manager and System Center Virtual Machine Manager.

Microsoft System Center Operations Manager	Microsoft System Center Configuration Manager	Microsoft System Center Virtual Machine Manager
Discover, monitor and synchronize devices	Agent-free management of PowerEdge servers	Supports PowerEdge servers and Dell EMC Solutions for Microsoft Azure Stack HCI
Monitor PowerEdge servers and Dell EMC network switches	Automate deployment and configuration with operational templates	Automated cluster deployment and configuration with operational templates
Monitor PowerEdge MX and view storage association with compute node	Monitor and remediate configuration compliance	Multi-vendor hypervisor deployment, Hyper-V, VMware and Linux
Monitor server power and performance	Windows and non-Windows operating system deployment	Automated updating through Microsoft Cluster-Aware Updating without impact to running workloads
iDRAC agent-free management (licensed) or agent-based management for free	Operating system agnostic hardware updates – on-demand or scheduled	

OpenManage Integrations for Microsoft System Center are licensed per-node. Each licensed node can be used, with a specific instance of the Microsoft console. Detailed information on licensing can be found in the OpenManage Integrations Licensing Guide.

OpenManage Integration with Microsoft Windows Admin Center

Comprehensive, remote management of individual servers is an essential capability whether you are managing a small infrastructure or a large enterprise. Microsoft Windows Admin Center is a lightweight, browser-based application that provides deep health and status information for individual servers or clusters.

The Dell EMC OpenManage Integration with Microsoft Windows Admin Center simplifies discovery of PowerEdge servers and Dell EMC Solutions for Microsoft Azure Stack HCI. Once discovered, you can select specific servers or clusters for more action.

Through native integration with the Microsoft Windows Admin Center interface, this OpenManage Integration gives you centralized access to each of the servers and clusters in your environment. It is a great tool when used exclusively for server lifecycle management, health status, monitoring and troubleshooting. It is also a valuable complement to the OpenManage Enterprise console and the OpenManage Integrations for Microsoft System Center.

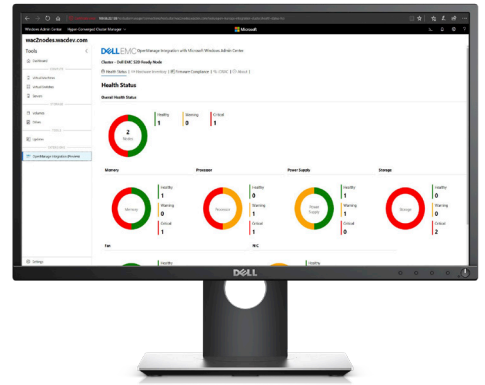

Dell EMC OpenManage Ecosystem Portfolio for full-stack visibility and control

In modern IT infrastructures, management visibility and control across the ecosystem is critical. Dell EMC OpenManage systems management offerings help provide seamless management of PowerEdge servers and solutions on-premises and across your cloud infrastructures.

Our ecosystem of solutions for Microsoft, VMware, RedHat Ansible and

ServiceNow are designed to break down the information silos between vendors for full-stack management of your virtual and cloud infrastructures. Our solutions also provide customized scripting and deeper control of your environment. By enabling native access to the integrated Dell Remote Access Controller (iDRAC) and the OpenManage Enterprise console, OpenManage Integrations and APIs give you real-time access to OpenManage innovations from a single interface. The Dell EMC OpenManage ecosystem of solutions enables industry-leading visibility and control across your infrastructure -- server, operating system and hypervisor.

OpenManage Integration with Microsoft Windows Admin Center

Streamline management with the following features:

- View inventory of PowerEdge servers and Dell EMC Microsoft Azure Stack HCI Ready Node clusters from within the Microsoft Windows Admin Center interface
- Troubleshoot issues with a dashboard view of system health and status
- Update notifications through Dell EMC Repository Manager when new catalogs are available
- Direct link and launch of iDRAC for integrated management of individual servers or cluster nodes
