02 Pace of Transformation
Successful Acceleration Of Digital Transformation Programs

- Yes, for all of our digital transformation programs: 12%
- Yes, for most of our digital transformation programs: 29%
- Yes, for some of our digital transformation programs: 39%
- No – we tried, but were unable to successfully accelerate any digital transformation programs: 8%
- No, but we are planning to: 7%
- No and we are not planning to: 3%
- I don’t know: 3%

80% have successfully accelerated at least some of their digital transformation programs this year

*Have you successfully accelerated any of your digital transformation programs this year?* Base: all 2020 respondents (4300)
Digital Transformation Programs Accelerated

- Strengthening our cybersecurity defenses: 48%
- Rolling out broader working from home/remote working capabilities: 44%
- Remote patient care and diagnosis **: 43%
- Reinventing how we deliver digital experiences to customers & employees: 38%
- Using data in completely new ways: 37%
- Transforming our services and consumption models: 34%
- Extending our business domain: 33%
- Transforming our Edge deployments (and its connection with the core and the cloud): 33%
- Smart Manufacturing/Industry 4.0 initiatives *: 33%
- Transforming our processes with AI initiatives: 30%
- Personalized/Precision medicine **: 24%

*Which digital transformation programs have you successfully accelerated this year?* Base: respondents from organizations which have successfully accelerated at least some digital transformation programs (3427), except asterisked answer options. Not showing “Other” or “Don’t know” options

* Indicates answer only shown to respondents from the manufacturing industry

** Indicates answer only shown to respondents from the public and private healthcare industries

© Copyright 2020 Dell Inc.
We have an engaged leadership team (championing digital transformation) 46%
We have an agile, remote workforce 42%
We have the right in-house digital skills 41%
We have the right technologies to work at the speed of business 41%
Our employees have ready access to high speed internet in their homes 41%
We rapidly shifted our digital investment priorities 37%
We have a mature digital culture 35%

“What enabled you to successfully accelerate your transformation programs?” Base: respondents from organizations which have successfully accelerated at least some digital transformation programs (3427).
03 Barriers to Transformation
“What are the main barriers to digitally transforming your organization?”
Base: all 2020 respondents (4300)
Not showing respondents who selected “Other” or “There are no barriers”

Data privacy and security concerns: 31%
Lack of budget and resources: 30%
Unable to extract valuable insights from data and/or information overload: 29%
Lack of economic growth: 24%
Lack of the right in-house skill sets and expertise (analytics, technology, and business skills): 24%
Regulation or legislative changes: 23%
Immature digital culture: lack of alignment and collaboration across the company: 21%
Lack of the right technologies to work at the speed of business: 21%
Lack of coherent digital strategy and vision: 18%
Weak digital governance and structure: 18%
Lack of the right senior support/leadership: 17%
A fragmented or siloed computing environment: 16%
We are temporarily closed for business (in relation in Covid-related disruption): 15%
Reactive approach to competitor activities: 15%

Data privacy concerns and lack of budget continue to be the two primary barriers to digital transformation, as they were in 2018.

*What are the main barriers to digitally transforming your organization?* Base: all 2020 respondents (4300), all 2018 respondents (4600) and all 2016 respondents (4000) * Indicates answer option asked and reported on as two separate options in 2016 and 2018
How Will Organizations Transform?
© Copyright 2020 Dell Inc.

Investing in digital skills/talent
- 2020: 49%
- 2018: 46%
- 2016: 27%

Sharing knowledge across business functions
- 2020: 48%
- 2018: 45%
- 2016: 19%

Integrating digital goals into all departmental/staff objectives
- 2020: 46%
- 2018: 43%
- 2016: 45%

Using emerging tech to develop and motivate staff in different, more engaging ways (e.g. through gamification)
- 2020: 40%

Addressing the digital skills gap through our diversity and inclusion programs
- 2020: 37%

We’ve always encouraged remote working
- 2020: 31%

In communication with/from the C-Suite to identify discrete projects in the business that can be digitized
- 2020: 30%

Appointing/ed a Chief Data Officer
- 2020: 20%

Hosting hackathons/scrums to encourage innovation and collaboratively fix problems
- 2020: 17%

“Thinking about what a digital business looks like, which of the following is your organization doing?” Base: Base: all 2020 respondents (4300), all 2018 respondents (4600) and all 2016 respondents (4000)
Digital Transformation Strategies

*Thinking about your digital transformation strategy, which of the following is your organization doing?* Base: all 2020 respondents (4300)

- Making decisions based on data in real-time: 57%
- Prioritizing sustainable technology: 49%
- Practicing DevSecOps: 42%
- Working with LOBs to identify digital Use Cases: 38%
- Practicing Ci/CD: 34%
- Actively encouraging a fail-fast-then-succeed mindset: 29%
- I don’t know: 3%
- None of these: 2%

Most businesses are now making decisions based on data in real-time.
Addressing the Following ‘Attributes of a Digital Business’

- Predictively spot new opportunities: 36% (2020), 32% (2018), 40% (2016)
- Innovate in an agile way: 38% (2020), 28% (2018), 37% (2016)
- Provide unique, personalized experiences: 38% (2020), 26% (2018), 36% (2016)
- We prove we can be trusted: 56% (2020)
- We are transparent: 49% (2020)

“How is your organization addressing each of the below to stay competitive and succeed in this increasingly digital world?” Base: all 2020 respondents (4300), all 2018 respondents (4600) and all 2016 respondents (4000). Showing the proportion of respondents who selected “Doing well, organization-wide”
Areas of Investment
“In terms of your organization’s existing IT strategy, to what extent are you doing the following to support your digital business transformation?”

Base: all 2020 respondents (4300). Not showing “Don’t know” answers
Cybersecurity solutions (infrastructure, application and end-user device security)

Data management tools to transform data into something that is useful and protected

5G infrastructure

Privacy software (e.g. to help businesses know what data they have, evaluate…

Multi-cloud environment where each application is deployed in the most…

5G ready hardware

Artificial intelligence algorithms

Software: containers and serverless

Real-time applications at the Edge (sensor enabled data processing and…

Natural user interfaces (touch screen, gesture analysis, speech recognition)

Industrial robotics (automated, programmed robots, to perform tasks…

Mixed Augmented or Virtual Reality

Quantum computing

Distributed ledgers such as Blockchain

Commercial robotics (UAVs/drones, medical robots, co-bots etc.)

Evolutionary nanotechnology

Neuromorphic hardware

Additive manufacturing

Brain-machine interfaces

“What new innovations or solutions is your organization investing in over the next 1-3 years to enable digital business?” Base: all 2020 respondents (4300), all 2018 respondents (4600). Comparisons shown for options asked in 2018
Investment in Multi-Cloud Environments: Year On Year Breakdown

"In terms of your organization's existing IT strategy, to what extent are you doing the following to support your digital business transformation? Made significant investments in a multi-cloud environment" Base: all 2020 respondents (4300), all 2018 respondents (4600) and all 2016 respondents (4000). Not showing “Don’t know” answers.
“How confident are you that your organization will achieve the following, over the next 12 months, by investing in Edge?” Base: respondents who have, are currently or plan to invest in Edge (3782). Showing the proportion of respondents who selected “Very confident” or “Fairly confident”
The Digital Transformation Index III Benchmark Methodology
Methodology: Index based on respondents’ performance and progress against digital business attributes they agreed were imperative, plus current and planned investments for digital transformation.

All performance related questions from the research were filtered through, and 1250 points allocated across the curve.
Benchmark Questions and Scores (i)

How is your organization addressing each of the below to stay competitive and succeed in this increasingly digital world?

• Predictively spot new opportunities
• Innovate in an agile way
• We prove we can be trusted
• We are transparent
• Provide unique, personalized experiences
• Always on, operate in real time

For each of the above, respondents selected one of the below statements (score in brackets):

Doing well, organization-wide (128 points)
Doing well, in pockets of the organization (e.g. some regions/departments) (70 points)
Not doing well, organization-wide (20 points)
Not doing well, in pockets of the organization (10 points)
Research/planning stage (5 points)
No plans (0 points)
I don’t know (0 points)

Maximum score = 768 points

In terms of your organization’s existing IT strategy, to what extent are you doing the following to support your digital business transformation?

• Made significant investment in Edge (bringing computation, connectivity and data storage closer to where it is needed rather than waiting for data to be sent to the cloud and back)
• Made significant investments in a multi-cloud environment
• Made significant investments in Artificial Intelligence (AI)
• Made significant investments in data management and analytics
• Made significant investments in cybersecurity and privacy
• Made significant investments in 5G infrastructure
• Made significant investments in on-demand digital services
• Made significant investments in the digital workplace

For each of the above, respondents selected one of the below statements (score in brackets):

Fully completed most recent round of investment (20 points)
In process of doing – mature stages (15 points)
In process of doing – early stages (10 points)
Planned to do (3 points)
Not done and no plans to do (0 points)
I don’t know (0 points)

Maximum score = 160 points
What new innovations or solutions is your organization investing in over the next 1-3 years to enable digital business?

• Artificial intelligence algorithms (near-autonomous/learning technology, trained to automatically answer questions, discover insights and provide recommendations) (11 points)
• Real-time applications at the Edge (sensor enabled data processing and location aware technologies that can send and receive data) (11 points)
• Quantum computing (use the properties of quantum physics to store data and perform computations; resulting in a leap in processing power) (0 points)
• Neuromorphic hardware (an electronic system for information processing. It resembles the behavior of a biological nervous system, can learn from its inputs and requires very little power) (6 points)
• Brain-machine interfaces (devices that enable its users to interact with computers by mean of brain-activity only) (0 points)
• Evolutionary nanotechnology (in shaping matter at the atomic and molecular scale, nanotechnology offers the potential for new, faster kinds of computers and more efficient power sources) (0 points)
• Additive manufacturing (creates three dimensional objects by depositing materials, usually in layers) (5 points)
• Mixed Augmented or Virtual Reality (11 points)
• Natural user interfaces (touch screen, gesture analysis, speech recognition) (11 points)
• Distributed ledgers such as Blockchain (6 points)

• 5G ready hardware (5 points)
• 5G infrastructure (5 points)
• Data management tools to transform data into something that is useful and protected (11 points)
• Cybersecurity solutions (infrastructure, application and end-user device security) (11 points)
• Privacy software (e.g. to help businesses know what data they have, evaluate their risks and disclose data to customers upon request) (11 points)
• Commercial robotics (UAVs/drones, medical robots, co-bots etc.) and/or Industrial robotics (automated, programmable robots, to perform tasks with high precision and repeatability) (11 points)
• Software: containers (standard unit of software that packages up code and all its dependencies so the application runs quickly in any IT infrastructure) and serverless (built on next-generation cloud services that auto-scale and charge only when used) (11 points)
• Multi-cloud environment where each application is deployed in the most appropriate cloud (private, public or hybrid) (11 points)
• We are not investing in any technology initiatives to enable digital business (0 points)
• I don’t know (0 points)

Respondents scored for each of the above (score in brackets)

Maximum score = 137 points
Thinking about your digital transformation strategy, which of the following is your organization doing?

- Practicing Ci/CD (continuous integration, continuous delivery) (18 points)
- Actively encouraging a fail-fast-then-succeed mindset (18 points)
- Working with LOBs to identify digital Use Cases (18 points)
- Practicing DevSecOps (creating a ‘security as a code’ culture. Building robust security and privacy protocols into all devices, applications and algorithms) (18 points)
- Making decisions based on data in real-time (18 points)
- Prioritizing sustainable technology (i.e. using recyclable material/technologies that use less power) (5 points)
- I don’t know (0 points)
- None of these (0 points)

Respondents scored for each of the above (score in brackets)

**Maximum score = 95 points**

Thinking about your workforce in the digital era, which of the following is your organization doing?

- Integrating digital goals into all departmental/staff objectives (10 points)
- Sharing knowledge across business functions (for example, equipping IT leaders with business skills and business leaders with IT skills and / or dispatching IT staff to specific LoB departments) (10 points)
- Appointing/ed a Chief Data Officer (10 points)
- In communication with/from the C-Suite to identify discrete projects in the business that can be digitized (10 points)
- Investing in digital skills/talent (i.e. teaching all employees how to code, training IT staff on automation, cloud, etc.) (10 points)
- Hosting hackathons/scrums to encourage innovation and collaboratively fix problems (10 points)
- We’ve always encouraged remote working (10 points)
- Addressing the digital skills gap through our diversity and inclusion programs (10 points)
- Using emerging tech to develop and motivate staff in different, more engaging ways (e.g. through gamification) (10 points)
- I don’t know (0 points)
- None of these (0 points)

Respondents scored for each of the above (score in brackets)

**Maximum score = 90 points**

Digital Transformation and COVID-19
Proportion Of Staff Working Remotely

Before the pandemic

On average
25%

Proportion of staff working remotely
- 0-30%
- 30-60%
- 60-90%
- 90-100%
- Don't know

Today

On average
52%

Proportion of staff working remotely
- 0-30%
- 30-60%
- 60-90%
- 90-100%
- Don't know

“What proportion of your organization’s staff worked remotely before the pandemic/are currently working remotely?” Base: all 2020 respondents (4300)
Responses To COVID-19

"As a result of the business disruption this year, to what extent do you agree or disagree with the following statements?"
Base: all 2020 respondents (4300). Showing the proportion of respondents who selected “Strongly agree” or “Somewhat agree”

- I am concerned that we didn’t transition to becoming a digital business fast enough: 50%
- We are reinventing our business model: 79%
- We’ve ensured our customers’ digital experience is seamless: 84%
- We’re seeing a more humane side of business (driven by wanting to help society at large): 83%

While most organizations have been able to maintain a seamless customer experience during COVID-19, many are reinventing their business model as a result of the upheaval.

Actions Taken to Support Wider Coronavirus Effort

- Opened-up new digital channels to support customers: 43%
- Loaned people with IT skills/knowledge to the relief effort: 31%
- Set-up funds to support organizations that urgently need new technology and mobile devices: 29%
- Sharing data with a public body/another business to aid the relief effort: 27%
- Loaned unused computing power to the relief effort (i.e. via crowd-sourced computing platforms): 24%
- Deploying our additive manufacturing capabilities (i.e. 3D printers) to produce vital medical equipment (to ease supply shortages)*: 23%
- Providing emerging technologies such as robotics or VR to support the safe treatment of patients at a distance**: 21%

We have done this
We are in the process of doing this
We’ve not done this yet but would do in the event of subsequent disasters
We’re not equipped to do this/not applicable to our business

Which of the following has your organization done to support the wider coronavirus effort?* Base: all 2020 respondents (4300), except asterisked options:
* Indicates option was only shown to respondents from organizations in the manufacturing industry, or who work in the production and manufacturing, or supply chain or logistics departments.
** Indicates option was only shown to respondents from organizations in the public and private healthcare industry.

The coronavirus crisis has shown us that we need a more agile, scalable IT environment that provides for contingencies.

Myself / my team are at risk of burn-out from trying to adapt our IT strategy in these abnormal times.

We expect to gain market share (win business from competitors that couldn’t adapt fast enough).

I am proud of my team/my organization in the way that we’ve adapted our IT and business/operational strategy.

“As a result of the business disruption this year, to what extent do you agree or disagree with the following statements?” Base: all 2020 respondents (4300). Showing the proportion of respondents who selected “Strongly agree” or “Somewhat agree”.
As a result of the business disruption this year, to what extent do you agree or disagree with the following statements? Base: all 2020 respondents (4300).

Showing the proportion of respondents who selected “Strongly agree” or “Somewhat agree”

- I am worried that my organization might not survive the next couple of years: 32%
- I believe my organization will survive but we will shed many more jobs and it will take years to return to profitability/previous expenditure levels: 60%
- I am confident that if we survive, we will emerge a stronger digital organization: 89%
"How confident are you that your organization’s data and AI are advanced enough to be able to support efforts to develop medicines/technologies to fight COVID-19?" Base: respondents from organizations in the public and private healthcare industries (392)
09 Expectations For The Future

## Automotive - Where they’re excelling

### Transformation Acceleration

- 81% accelerated digital transformation programs vs. 80% globally
- 15 pp jump in Digital Leaders and Adopters vs. 15pp globally
- 41% could accelerate because they had the right digital skills vs. 41% globally
- 36% rapidly shifted their digital investment priorities vs. 37% globally

### Transformation Strategies

- 27% in communication with the C-Suite to digitize vs. 30% globally
- 19% Appointing/ed a Chief Data Officer vs. 20% globally
- 35% practicing CiCD vs. 34% globally
- 32% actively encouraging a fail-fast-and-then succeed mindset vs. 29% globally

### Successes

- 80% reinventing their business model vs. 79% globally
- 89% proud of how their team has adapted vs. 89% globally
- 52% are transparent vs. 49% globally

Base: respondents from the Automotive sector in 2020 (384)
Automotive – Standout investment areas

Currently investing in

- **Artificial intelligence** (37% in the mature stages or fully complete vs. 32% globally)
- **Multi-cloud environment** (51% in the mature stages or fully complete vs. 47% globally)

Planning to invest in 1-3 years

- **Commercial/industrial robotics** (44% vs. 29% globally)

Base: respondents from the Automotive sector in 2020 (384)
Barriers & Concerns

- 31% are worried that they won’t survive (vs. 32% globally)
- **Top 3 Barriers**
  1. Unable to extract valuable insights from data and/or information overload (34% vs. 29% globally)
  2. Data privacy and security concerns (28% vs. 31% globally)
  3. Lack of budget and resources (28% vs. 32% globally)

Transformation strategies & investments

- **Least likely/lowest investment area** (mature stages or fully complete):
  - 5G infrastructure (29% vs. 28% globally)
  - Privacy software (30% vs. 35% globally)
- **Future investment plans lagging behind**
  - Multi-cloud environment (31% vs. 35% globally)

Base: respondents from the Automotive sector in 2020 (384)

*What proportion of your organization’s staff worked remotely before the pandemic/are currently working remotely?*

Base: all 2020 respondents (4300) APJC (1400)
“As a result of the business disruption this year, to what extent do you agree or disagree with the following statements?”

Base: all 2020 interim respondents (4300) APJC (1400). Showing the proportion of respondents who selected “Strongly agree” or “Somewhat agree”
Adapting to Unprecedented Upheaval

As a result of the business disruption this year, to what extent do you agree or disagree with the following statements?

- The coronavirus crisis has shown us that we need a more agile, scalable IT environment that provides for contingencies
- Myself / my team are at risk of burn-out from trying to adapt our IT strategy in these abnormal times
- We are reinventing our business model
- I am proud of my team/my organization in the way that we’ve adapted our IT and business/operational strategy

Base: respondents from APJC (1400). Showing the proportion of respondents who selected “Strongly agree” or “Somewhat agree”
I am worried that my organization might not survive the next couple of years

I believe my organization will survive but we will shed many more jobs and it will take years to return to profitability/previous expenditure levels

“As a result of the business disruption this year, to what extent do you agree or disagree with the following statements?”
