The N1500 switch series offers a power-efficient Gigabit Ethernet (GbE) network-access switching solution with integrated 10GbE uplinks. With high-performance capabilities and wire-speed performance, utilizing a non-blocking architecture to easily handle unexpected traffic loads, the switches offer simple management and scalability via an 40Gbps (full-duplex) high availability stacking architecture that allows management of up to four switches from a single IP address. An integrated 80PLUS-certified power supply and features such as Energy-Efficient Ethernet and short cable detection provide energy efficiency to help decrease power and cooling costs.

Modernize campus network architectures
Modernize campus network architectures with a power-efficient and resilient 1/10GbE switching solution with Power over Ethernet Plus (PoE+). Select N1500 models offer 24 or 48 ports of PoE+ to deliver clean power to network devices such as wireless access points (APs), Voice-over-IP (VoIP) handsets, video conferencing systems and security cameras.

Leverage familiar tools and practices
All N-Series switches include Dell EMC Networking OS 6, designed for easier deployment, greater interoperability and a lower learning curve for network administrators. One common command line interface (CLI) and graphic user interface (GUI) using a well-known command language gets skilled network administrators productive quickly. With USB auto-configuration, network administrators can rapidly deploy mirrored configurations to numerous devices by simply inserting a USB key.

Deploy with confidence at any scale
N1500 series switches help create performance assurance with a data rate up to 176Gbps (full duplex) and a forwarding rate up to 164Mpps. Scale easily by stacking with 10GbE ports. Switch stacks of up to 200 1GbE ports can be managed from a single screen using the highly available stacking architecture for high-density aggregation with seamless redundant availability. N-Series switches help provide certainty with a lifetime warranty that covers software upgrades, hardware repair or replacement, and optics and cables purchased with the switch. Details at Dell.com/LifetimeWarranty.*

Hardware, performance and efficiency
- Up to 48 line-rate GbE RJ-45 ports and four integrated 10GbE SFP+ ports.
- Up to 48 ports of PoE+ with an optional external power supply.
- Up to 200 1GbE ports in a 4-unit stack for high-density, high-availability in IDF, MDF and wiring closets.
- Non-stop forwarding and fast failover in stack configurations.
- Energy-Efficient Ethernet and lower power PHYs reduce power to inactive ports and idle links, providing energy savings from the power cord to the port.
- Fresh Air compliance for operation in environments up to 113°F (45°C) helps reduce cooling costs in temperature-constrained deployments.

*Select Networking products carry a Lifetime Limited Warranty with Basic Hardware Service (repair or replacement) for life. Repair or replacement does not include troubleshooting, configuration, or other advanced service provided by Dell EMC ProSupport.
Deploying, configuring and managing

- USB auto-configuration rapidly deploys the switch without setting up complex TFTP configurations or sending technical staff to remote offices.
- Management via an intuitive and familiar CLI, embedded web server (GUI), SNMP-based management console application (including Dell OpenManage Network Manager), Telnet or serial connection.
- Private VLAN extensions and Private VLAN Edge support.
- AAA authorization, TACACS+ accounting and RADIUS support for comprehensive secure access support.
- Authentication tiering allows network administrators to tier port authentication methods such as 802.1x, MAC Authentication
- Bypass and Captive Portal in priority order so that a single port can provide flexible access and security.
- Layer 3 Lite IPv4 and IPv6 functionality including static routing and Routing Information Protocol support.
- Remote Switch Port Analyzer (RSPAN) monitors ports across a Layer 2 domain without costly dedicated network taps.

**Technical specifications**

**Physical**

- 4 integrated front 10GbE SFP+ dedicated ports, 2 10GbE can be used as stacking ports
- USB (Type A) port for configuration via USB flash drive
- Auto-negotiation for speed and flow control
- Auto MDI/MDIX, port mirroring
- Flow-based port mirroring
- Broadcast storm control
- Energy-Efficient Ethernet per port settings
- Redundant variable speed fans
- Air flow: I/O to power supply
- Integrated power supply: 40W AC (N1524), 100W AC (N1548), 600W AC (N1524P, N1548P)
- RJ45 console port with RS232 signaling (RJ-45 to female DB-9 connector cable included)
- Dual firmware images on-board
- Switching engine model: Store and forward
- Forwarding rate: 128Mpps (N1524 and N1524P): 164Mpps (N1548 and N1548P)
- Link aggregation: 64 LAG groups, 144 dynamic ports per stack, 8 member ports per LAG
- Priority queues per port: 8
- Line-rate Layer 2 switching: All (non-blocking)
- Line-rate Layer 3 routing: All (non-blocking)
- Flash memory: 256MB
- Packet buffer memory: 1.5MB
- CPU memory: 1GB
- RIP routing interfaces: 128
- VLAN routing interfaces: 128
- VLANs supported: 512
- Protocol-based VLANs: Supported
- ARP entries: 2,048 (IPv4)/512 (IPv6)
- NDP entries: 400
- Access control lists (ACL): Supported
- MAC and IP-based ACLs: Supported
- Time-controlled ACLs: Supported
- Max number of ACLs: 100
- Max ACL rules system-wide: 2,048
- Max rules per ACL: 1,023
- Max ACL rules per interface (IPv4): 1,023 ( ingress), 1,023 (egress)
- Max ACL rules per interface (IPv6): 512 ( ingress), 509 (egress)
- Max VLAN interfaces with ACLs applied: 24

**Chassis**

- Size (1RU, H x W x D): N1524 and N1548: 1.7 in x 17.3 in x 10.1 in (43.2 mm x 440.0 mm x 257.0 mm)
- N1524P and N1548P: 1.7 in x 17.3 in x 15.2 in (43.2 mm x 440.0 mm x 387.0 mm)
- Approximate weight: 6.6lbs/3kg (N1524), 12.8lbs/5.8kg (N1524P), 8.8lbs/4kg (N1548), 15.4lbs/7kg (N1548P)
- Rack mounting kit with 2 mounting brackets, bolts and cage nuts

**Environmental**

- Power supply efficiency: 80% or better in all operating modes
- Max. thermal output (BTU/hr): 103.1 (N1524), 2972 (N1524P), 152.2 (N1548), 5824.3 (N1548P)
- Power consumption max (watts): 30.2 (N1524), 2972 (N1524P), 509 (egress), 1,023 (ingress)
- Operating temperature: 32° to 113°F (0° to 45°C)
- Operating humidity: 95%
- Storage temperature: –40° to 149°F (–40° to 65°C)
- Storage relative humidity: 85%
- Rack mounting kit with 2 mounting brackets, bolts and cage nuts

### RFC compliance and additional features

**General Internet protocols**
- General Internet protocols are supported. For a detailed list, please contact your Dell EMC representative.

**General IPv4 protocols**
- General IPv4 protocols are supported. For a detailed list, please contact your Dell EMC representative.

**General IPv6 protocols**
- General IPv6 protocols are supported. For a detailed list, please contact your Dell EMC representative.

**Layer 3 functionality**
- 1058 RIPv1
- 2082 RIPv-2 MD5 Auth
- 1724 RIPv2 MIB Extension 2453 RIPv2

**Multicast**
- 2932 IPv4 MIB
- 4541 IGMP v1/v2/v3
- Snooping and Querier
- IEEE 802.1ag draft 8.1–Connectivity Fault Management

**Quality of service**
- 2474 DiffServ Field
- 2475 DiffServ Architecture
- 3580 802.1X with RADIUS
- 3737 Registry of RMOM MIB

IT Lifecycle Services for Networking

Experts, insights and ease
Our highly trained experts, with innovative tools and proven processes, help you transform your IT investments into strategic advantages.

Plan & Design
Let us analyze your multivendor environment and deliver a comprehensive report and action plan to build upon the existing network and improve performance.

Deploy & Integrate
Get new wired or wireless network technology installed and configured with ProDeploy. Reduce costs, save time, and get up and running fast.

Educate
Ensure your staff builds the right skills for long-term success. Get certified on Dell EMC Networking technology and learn how to increase performance and optimize infrastructure.

Manage & Support
Gain access to technical experts and quickly resolve multivendor networking challenges with ProSupport. Spend less time resolving network issues and more time innovating.

Optimize
Maximize performance for dynamic IT environments with Dell EMC Optimize. Benefit from in-depth predictive analysis, remote monitoring and a dedicated systems analyst for your network.

Retire
We can help you resell or retire excess hardware while meeting local regulatory guidelines and acting in an environmentally responsible way.
