

must-haves to secure
your mid-market business

Partner with Dell Technologies and protect your business with fierce, unseen power.

1 | A powerful partner

There's nothing like the confidence of knowing you have a team of experts in your corner, extending your IT capabilities and helping your business adapt for the future.

2 | Trusted devices

You need devices that your business can take anywhere. That means business PCs with industry-leading security offers built-in and available, like SafeID, SafeBIOS, and SafeData.

3 | Trusted infrastructure

A multi-layered approach to security can provide protection across your entire business. That means servers with end-to-end security, storage featuring drive-level encryption and purpose-built backup appliances.

4 | Trusted data

Your data should be safe no matter where it goes. Solutions like an Integrated Data Protection Appliance and SafeData are designed to help mid-market businesses protect data, prevent threats and keep business moving at full speed.

Find all the ways Dell Technologies can help secure your business.
