DATA PROTECTION FOR VMWARE
Simply Powerful Data Protection – Converted, Cloud and Beyond

The majority of workloads today are in virtual environments. Protecting these workloads is essential, but can involve many different types of workloads and different environments.

Dell EMC Data Protection for VMware

5 Reasons to Choose

1. **Simplifying and streamlining.** Including automation for VM protection policy management, vStorage APIs for deduplication (VADP) and VAAI (Virtual Application API) for VM management.
2. **Comprehensive coverage.** Protection for the largest application ecosystem – on-premises and in the cloud.
3. **Faster performance.** Simple virtual backup, faster performance, with industry-leading client-side deduplication.
4. **Integration.** Comprehensive integration with VMware solution management of every backup and recovery task from on-premises to cloud-based tools.
5. **Lower cost to protect.** Less than half a penny per GB/month.

VMware Optimized Data Protection for Mid-size Organizations

A new converged appliance that provides backup, recovery, replication, search, and analytics and cloud extensibility for physical and virtual environments.

- **Simple.** Ready-to-use – high reliability, no software installation required.
- **Lowest cost to protect.** Less than half a penny per GB/month.
- **Lowest total cost.** $/per logical GB. Actual cost will vary.
- **Lowest cost to protect.** Less than half a penny per GB/month.
- **Lowest cost to protect.** Less than half a penny per GB/month.

VMware Optimized Data Protection for the Cloud

A new, converged appliance that provides backup, recovery, replication, search, and analytics and cloud extensibility for physical and virtual environments.

- **Simple.** Ready-to-use – high reliability, no software installation required.
- **Lowest cost to protect.** Less than half a penny per GB/month.
- **Lowest total cost.** $/per logical GB. Actual cost will vary.
- **Lowest cost to protect.** Less than half a penny per GB/month.
- **Lowest cost to protect.** Less than half a penny per GB/month.

Powerful data protection has made Dell EMC, the #1 Data Protection and storage vendor for the past 10 years. Today, when it's time to protect more, go to more, download whitepaper “Dell EMC VMware Optimized Data Protection for Mid-size Organizations” and “Dell EMC VMware Optimized Data Protection for the Cloud”.
