

FUTURE-PROOF

LOYALTY PROGRAM

All-inclusive software listings

Midrange Storage

Dell EMC Unity

Dell EMC Unity software includes:

Data management: Unisphere, Unisphere Central, Cloud Tiering Appliance, CloudIQ, Inline Compression and Deduplication, QoS, IP Multi-Tenancy, Dynamic Pools, and ESA Adaptor

Local protection: Snapshots/Thin Clones, Data-At-Rest Encryption, Anti-Virus, AppSync Basic

Remote protection: Unified Sync/Async Remote Replication and RecoverPoint Basic (does not include RecoverPoint appliance hardware)

Ecosystem integration: VMware, Microsoft, OpenStack Integration Software

Hybrid arrays: FAST Cache and FAST VP

PowerVault ME4

PowerVault ME4 software includes:

Data optimization: Distributed RAID, Thing Provisioning, Volume Copy, SSD Read Cache, 3-Level Auto-Tiering

Local protection: Snapshots, D@RE (SEDs)

Remote protection: Replication (Asynchronous)

Virtualization integrations: VMware vSphere and vCenter SRM, Microsoft Hyper-V

Data Management: ME Storage Manager (HTML5)

Midrange Storage

SC All-Flash

SC All-Flash software includes:

Data optimization: Data Progression RAID Tiering, Deduplication, Compression, Live Migrate, Dynamic Capacity, Thin Clones

Management: Dell Storage Manager (DSM), DSM Chargeback, Virtual Ports, VLAN tagging, QoS, VVOLS

Local and remote protection: Snapshots, Encryption, Dynamic Controllers, Live Volume, Remote Instant Replay, Replay Manager

High-End Storage

PowerMax

Dell EMC PowerMax essentials package includes:

Data management: Unisphere, REST APIs, QoS, non-disruptive migration

Storage efficiency: Inline compression and deduplication, thin provisioning

Local protection: SnapVX, iCDM Basic (AppSync)

Ecosystem integration: VMware

High-End Storage

VMAX All Flash

Dell EMC VMAX All Flash Software F package includes:

Data management: Unisphere, REST APIs, QoS, non-disruptive migrations

Storage efficiency: Inline compression, thin provisioning

Local protection: SnapVX, iCDM Basic (AppSync)

Ecosystem integration: VMware

XtremIO

XtremIO X2 software includes:

Data management: XMS management REST APIs, VSI plug-in for vCenter, ESI plug-in for Windows, PowerShell API, CLI

LDAP/LDAP Storage efficiency: Inline deduplication & compression, thin provisioning, XVC Snapshots

Local protection: XtremIO XVC Snapshots, Advanced Data Protection (XDP), AppSync Basic, D@RE

Remote protection: XtremIO Replication

Ecosystem integration: VMware, Microsoft, OpenStack Integration Software

Unstructured Storage

Elastic Cloud Storage

ECS appliance includes:

The standard software license includes all available features needed to store, move, and manage data without any exclusions. This includes native storage applications and data services as well as select off-array applications as applicable. Dell EMC does not charge for ECS on-array software like Data-at-rest-Encryption; as well as off-array applications such as the ECS-Sync migration software and the CIFS-ECS tool.

Hyper-Converged Infrastructure

VxRail

VxRail includes:

VxRail includes the features of the vSphere License that is a bring-your-own (BYO) license scheme. VMware vSAN is included at the Enterprise level, fully featured; this may shift in future release to match the vSphere BYO model. VxRail assumes lifecycle management of BYO required software. All other software included is a single software level, all features included all the time:

- vSAN Enterprise
- vCenter Server
- vRealize Log Insight
- vSphere Ready (compatible with a broad-range of customer-supplied vSphere licenses)
- VxRail Remote Support
- RecoverPoint for VMs
