

PROCONSULT MIGRATION SERVICES

Migrate workloads, application content and databases to your future state

ESSENTIALS

Dell Technologies Consulting Services can help you realize the benefits of a modern cloud-based service model by:

- Accelerating migrations with our global delivery team of experts
- Leveraging our experience performing thousands of complex migrations for a wide variety of organizations
- Tailoring migrations to your schedule and business constraints
- Enabling your in-house resources to focus on higher priority initiatives

ProConsult Migration Services are available for:

- **VMware Cloud/Data Center**—Migrate workloads into VMware-based cloud platforms on-premises or co-location dedicated hardware
- **Public Cloud**—Migrate VM workloads to / from a VMware private cloud and a single public cloud instance
- **Office 365 Communications**—Migrate Exchange mailboxes to Exchange Online
- **Office 365 Collaboration**—Migrate SharePoint sites to SharePoint Online or user file shares to OneDrive for Business
- **Virtual Desktop Infrastructure**—Migrate user workspaces to Horizon View or Horizon Cloud or Workspace ONE
- **SQL Server**—Migrate SQL Server instances, databases and applications

Business Challenge

With the rise of cloud, IT organizations are being asked to migrate applications, databases and virtual machine workloads with greater frequency. However, many IT organizations lack the time, specialized tools or expertise to conduct these migrations in a reliable and repeatable manner.

How thoroughly have you thought through the considerations for your migration initiative? What business limitations could impact your migration schedule? How important are dependencies between your application content and associated infrastructure? How much insight do your business stakeholders expect throughout the migration process?

Dell Technologies Consulting Services can help you attain your future state and accelerate time to business value with our repeatable and mature migration methodologies.

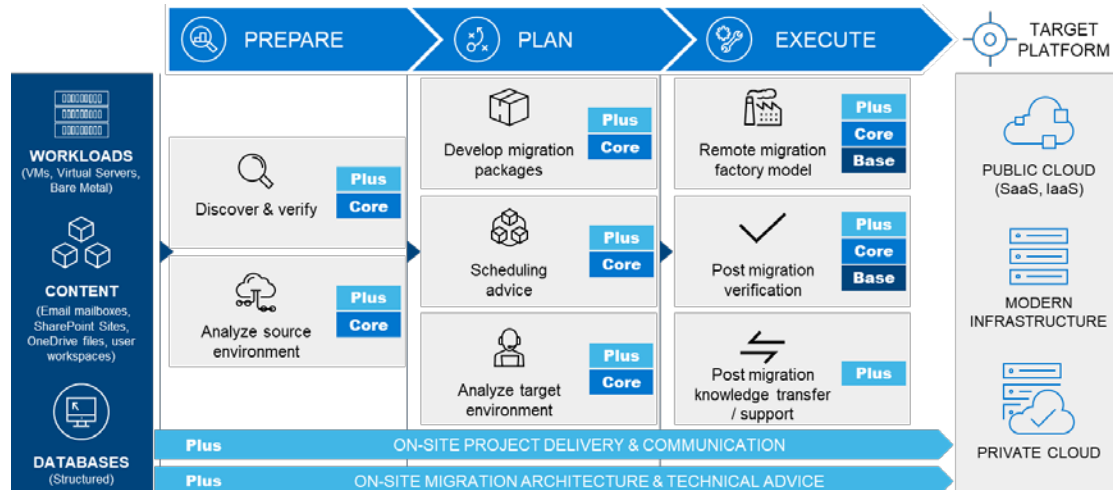

Service Description

Dell Technologies ProConsult Migration Services accelerate migrations with our global delivery team allowing your in-house resources to focus on higher priority initiatives.

Using our migration framework honed over many years for efficiency and quality, our consulting service experts will:

- Discover, analyze and verify the source environment
- Develop migration packages based on logical groupings
- Schedule migrations tailored to your schedule and business constraints
- Analyze the target environment for migration readiness
- Provide on-site migration architecture and technical advice
- Coordinate on-site project management and migration communications with your team
- Leverage our remote factory migration model for accelerating migration execution
- Perform post migration verifications on each move group
- Conduct a post migrate knowledge transfer and transition support to your in-house IT team
