Dell EMC Networking Aerohive wireless access points feature built-in distributed control technology that provides enterprise scalability without the need for controllers, advanced BYOD and security features, and cloud-based management via HiveManager, a network management system that is available for public or private cloud deployment.

### HiveManager Cloud-Based Network Management

HiveManager is a powerful cloud-based network management solution for Dell EMC Networking switches and access points. This next-generation management system allows administrators to plan, configure and deploy their network within minutes and maintain control through an informative, user-focused GUI.

**Key benefits:**

- Public or private cloud deployment options
- Flexible, cloud-based management
- Simplified deployment workflows
- Streamlined device and network configuration
- Centralized policy management
- Help desk-style troubleshooting interface

**Supported Dell EMC switches:**

- N100-ON
- N1500
- N2000
- N2128FX-ON
- N3000
- N3000E-ON
- N3132PX-ON

---

**Dell EMC Support**

HiveManager includes 1, 3 or 5 years of ProSupport for Multivendor Software, providing access to Dell EMC’s global team of certified engineers who serve as primary support provider for troubleshooting your environment. We deliver a consistent level of software support services for server, storage and networking hardware to minimize disruptions, while helping you maintain a high level of availability and operational excellence.
