

VxBlock Central software

Next generation CI management solution that further simplifies your VxBlock experience

More flexible, modular licensing options

- **Base** – Manage system and improve compliance with inventory reporting and alerting
- **Workflow Automation** – Provision infrastructure on-demand using engineered workflows through vRealize Orchestrator
- **Advanced Analytics** – View capacity and KPIs to discover deeper actionable insights through vRealize Operations
- **Lifecycle Management** (new, later in 2019) – Apply “guided path” software upgrades to optimize system performance

Software features above and beyond Vision

Dramatically simplify daily operations and accelerate your path to cloud

VxBlock Central software provides a single, unified interface for VMware cloud operations.

FAQs

Is VxBlock Central just Dell EMC Vision rebranded?

No. VxBlock Central is a new, feature-rich, next generation CI management solution providing comprehensive Awareness, Analytics and Automation capabilities and strong integration with VMware vRealize.

Do we have to migrate to VxBlock Central?

Yes. You must migrate to the new VxBlock Central software to stay up to date on the latest software features and security updates. No further software or security updates will be released for Dell EMC Vision.

Do we have to pay for VxBlock Central?

VxBlock Central Base is available at no additional cost to current Vision customers under active support contracts. Automation, Analytics and LCM functionality will be available with additional optional licenses.
